-WE- Genius Minds Productions announces
online premiere exclusively on **Amazon**
EVOLUTION: The Genius Equation
November 27, 2020

Filmmaker Paulina Amador and -WE- Genius Minds Productions announce the online premiere of the ground-breaking documentary feature film, **EVOLUTION: The Genius Equation** exclusively on Amazon, November 27, 2020. A visual masterpiece narrated by Linda Evans, **EVOLUTION** creates a new paradigm and explores the untapped resources of our mind, presenting brilliant experts in A.I., neurology, quantum physics, art and much more, reaching from the archives of antiquity to contemporary, cutting edge science.

- Ask yourself -

What if everyone woke up to their own unique capacity for inspiration and innovation? What if genius is a state of mind that anyone can access?

Featuring interviews with the greatest innovators of our time:

Dr. Michio Kaku (City University of New York) **David Gelernter** (Yale University) **Dr. Chiara Marletto** (Oxford University) **Dr. Norman Doidge** (author, *The Brain that Changes Itself*) **Dr. Feryal Ozel** (University of Arizona, Event Horizon Project) **Jason Padgett** (author, *Struck by Genius*), **Paris Reid** (artist) **Philippa Gregory** (author, *The Other Boleyn Girl*, *The White Queen*) **Dr. Poppy Crum** (Dolby Laboratories, Stanford University) **Margaret Starbird** (author, *The Woman with the Alabaster Jar*) **JZ Knight** (author, *State of Mind*, inventor, patented Blu Room technology) **Ramtha** (Spiritual Teacher of Ramtha's School of Enlightenment) **Dr. Stanley Krippner** (Saybrook University) **Dr. Sam Sternberg** (Columbia University)

Director, Paulina Amador remarks, Do we really think for ourselves?

It's important that people have the freedom to dig deeper and follow their curiosity. Many feel they are not allowed to think for themselves. It is the biggest problem in our current society that people don't value their own thoughts.

Michio Kaku says, 'All kids are born geniuses, but are crushed by society.'

But the most beautiful thing about this documentary is that it is not really about the scientists. It's about the viewer's own inspiration and thoughts.

Setting the record straight, EVOLUTION takes an in-depth look at the never before revealed controversy of timeless historical figures: Marie Curie, Leonardo da Vinci, Nindhursag, Aspasia, Mary Magdalene, Perenelle Flammel, Joan of Arc, Mileva Maric-Einstein, Elizabeth I – weaving their stories into a sumptuous visual tapestry of cinematic grandeur.

Visually, the documentary is unique in that it includes a mixture of original footage shot in nature combined with outstanding VFX effects. These include a dimensional doorway and other effects that defy classical physics. Some technical approaches used in the film include the use of drones, underwater filming, original live-action sequences, and both 2D and 3D animation.

**The film has a transformational impact on its viewers.
They will feel like Jason Padgett, author of Struck by Genius:
"I feel like I swallowed a star!"**

ABOUT

**EVOLUTION: The Genius Equation
inspires us to think for ourselves and
to explore our unlimited potential.**

One has to ask, does everyone have access to GENIUS?
What is the Secret? EVOLUTION will leave you with answers
to questions you didn't know you had.

-WE- Genius Minds Productions
is committed to unfolding the genius
within us all.

**Stay in touch with all things GENIUS.
Join us for an Extraordinary Journey!**
